HC-407A (Fixed Temperature Heat Detector)

Product Name : Fixed Temperature Heat Detector

Description : On the surface of the fixed-temperature(60° C) heat detector is exposed a temperature-preset sensor and a piece of metal that can increase the heat-receiving. When the fire makes the room temperature rise gradually until the temperature has risen and reached the preset point of alarm temperature(60° C), the alarm is initiated.

Features :
- With dual LED, easy to observe state of detector.
- The dual LED light up constantly when the detector alarms.
- With large metal surface to expose the air to sense the temperature.

Specification :

Voltage	24VDC System from Panel
Alarm temperature	60±5
Standby Current	0µA
Alarm Current	60mA
Suitable Temperature	-15~50° C
Suitable Humidity	0~95% RH
Size	103mm x 44mm
Weight	120g
Material	Fire-resisting ABS material
Joint Contact	Copper (zinc-plated)
Color	Ivory White
